

A NATIONAL SCHOOL COMPETITION TO CREATE THE BEST ORGANIC SCHOOL GARDEN LAUNCHED BY SBM LIFE SCIENCE IBERIA WITH SOLABIOL

In collaboration with MiJardin magazine and Cultivarte Agroambientales (NGO that promotes sustainable and ecological farming), SBM Life Science Iberia organized a school competition at national level to create the best bio organic allotment. To develop Solabiol brand on the Spanish market, Iberia team joins the educational course and work on turning our future customers into Solabiol ambassadors. The operation consists in offering some products to all the participants and a prize for the best allotment. The goal is to build a cooperative relation with schools and with Cultivarte Agroambientales. This

might be just the first of many other educational projects which could help us promote our brands.
